

3D SCANNING SERVICE

Save Money • Increase Efficiency • Accurate Model

Convert your existing space into the digital realm. We offer scanning services that can cover from small additions to mapping your entire facility

High Accuracy

Precise & dimensionally accurate point clouds with full color (1/8" accuracy at 65')

Low Operations Impact

Scanning has minimal on site requirements keeping production interference to a minimum, and your cost impacts low

Increase Efficiency

Validate real world layout against your 3D model or drawings to confirm fitment

Save Money

Having a more accurate model saves money and time with less field changes and redlines

Post Project Scan

Confirm & validate redline changes after project completion
